

# Paint by Numbers ( Nonogram )

...

Rica Bernadine Calbario  
CS 142

**What is a nonogram?**

# Nonogram

- other names: **Hanjie**, **Paint by Numbers**, **Picross**, **Griddlers**, **Pic-a-Pix**
- an encrypted image is revealed by coloring blocks/cells of a grid based on the numbers hinted at the sides.

# Nonogram

- **Hint numbers** → number of boxes that needs to be colored
- **Order** of the numbers indicate the order of the groups of colored blocks
- **B&W**: Must have at least **one space** in between sets
- **Colored**: same as B&W; sometimes no spaces for adjacent different colors

**Why is a nonogram an  
NP-complete problem?**

# Nonogram as an NP-complete problem

- Each nonogram displays a unique encrypted image.
- There is no “good” solution for all nonogram puzzles.
